

Revised Data Handling File (PUBLIC) - Release 200427

2020.04.27

=====

Since the middle of last year Van Husson initiated an effort to review the NASA station site logs and internal logbooks with a comparison to information that was available in public. Van found numerous pieces of information that were not previously disclosed or were reported incorrectly. A lot of these pertained to correction of biases and related issues, including missing entries, wrong entries, and entries with incorrect period of application dates.

Here we focus on the revised Data Handling file dated 200427. Since the revisions are not simply additional new entries and affect many stations and various time periods, their application requires careful review of the new vs the old (previous) version of the file used by each AC/AAC to ensure consistency. We assume here that you all use the last release of the Data Handling file dated 190925, so our comparisons are done with respect to that last release.

To simplify your task, we furnish (along with the standard text version of the new release) a PDF version that contains the revised/new records in the file highlighted in **RED** font so that you can easily spot the changes that you will need to apply.

The new file should NOT be implemented for the official ILRS products nor for the ILRS SSEM PP!!!

There is a special version for that purpose and it will be sent directly to the ACs involved.

+FILE/REFERENCE

VERSION 200427

RELEASE DATE 2020/04/27

DESCRIPTION range, time and pressure biases to be applied to SLR tracking data and periods to be excluded from data analysis.

INPUT Corrections to SLR tracking data collected from various tables at CDDIS and resolutions from the ILRS/ASC (AWG) and the T2L2 @ Jason-2 project over July 2008 to December 2017

A review of NASA systems' station logs by Van Husson has revealed numerous corrections that were previously unreported and some that provided the wrong dates and/or values.

Optional and historical corrections are listed at the end of this file, following a comment line like the one below:

The new Centre of Mass correction tables for LAGEOS, Etalon, LARES, Starlette/Stella and Ajisai, provided by Jose Rodriguez in late November 2019 are now mandatory for the new ILRS/ASC products, version v170 (daily) and v70 (weekly).

Last Updated: Apr. 27 2020 Added updates and corrections provided by Van Husson for NASA systems (191219 version)

Sep. 25 2019 Added hist. HARL (7501) Tb/Rb and edits, and new Wuhan2 (7396)
Jul. 22 2019 Addition of GGAO SLR (MOB7 7105) barometric pressure corrections
May 29 2019 New release with recommended and optional sections after EGU2019 ASC meeting
May 10 2019 Included future South Korean station Geochang (7395)
May 04 2018 New release with two POINT B missing entries for 7810 & 7824 included
Mar. 07 2018 New release with the T2L2 (edited) set of TB included

Jun. 06 2017 Yarragadee (7090) release 0 incorrect Met data day 17:152
 May 11 2017 Station Kunming2 (7819) new station replaces 7820 (Kunming)
 Apr. 20 2017 Station Changchun (7237) time bias of 1 ms on Feb. 16 and 17 2017
 Jul. 19 2016 Station 7394 (Sejong) new station, replaces 7359 (Daedok)
 May 12 2016 Station 7080 (MLRS) solve for range bias due to new configuration
 Nov. 18 2015 Station 7105 (MOB7) data edited from Nov. 9 2015 00:00 h UTC until Nov. 17 18:00 h UTC
 Sep. 30 2015 Adding stations Irkutsk(1891) Brazilia(7407), Wettzell SOSW(7827) as new stations
 Jul. 09 2015 Zimmerwald (7810) data not valid July 3 2015 to July 6 2015 8h
 Jul. 06 2015 San Fernando (7824) data not valid from June 17 2015 21h to June 18 2015 4h
 Sep. 09 2014 changed end date of Graz (7839) range bias to 1996/09/28
 Jul. 16 2014 remove of quarantine entries in the file (data are in quarantine in the data centers)
 May. 06 2014 Mt. Stromlo quarantine
 Apr. 29 2014 deletion of double lines
 Apr. 04 2014 Updated biases 7080 in 1990
 Mar. 26 2014 Updated biases for ITRF2013 processing
 Mar. 18 2014 Update from CDDIS free format data corrections, new flag
 Feb. 19 2014 Change of Flag for stations with preliminary coordinates to V (P = pressure bias)
 Feb. 05 2014 incorrect weather data at Haleakala (7119) data to be deleted
 Feb. 04 2014 solve for range biases for Kunming
 Jan. 30 2014 Kunming released from quarantine
 Jan. 27 2014 Wettzell back from quarantine but solving for a range bias is necessary
 Oct. 29 2013 McDonald back to normal operation, without time bias
 Oct. 22 2013 new station Deadok, in quarantine
 Oct. 01 2013 added information on new CoM tables,
 Jun. 18 2013 Haleakala (7119) data released from quarantine
 Apr. 22 2013 Kunming (7820) in quarantine due to more than 90 days without data
 Apr. 19 2013 Haleakala (7119) in quarantine due to telescope removal
 Mar. 08 2013 Simeiz (1873) big range bias
 Feb. 21 2013 Zimmerwald (7810) back to standard processing
 Feb. 18 2013 Zimmerwald (7810) in quarantine due to longer break
 Jan. 08 2013 Russian stations, 1887, 1888, 1889, 1890 no longer in quarantine
 Nov. 12 2012 San Juan (7406) back to normal
 Oct. 24 2012 San Juan (7406) with big range biases since Oct. 13 2012
 Sep. 07 2012 Riga (1884) and Simeiz data released from quarantine
 Aug. 07 2012 Riga (1884) CRD data put into quarantine
 Aug. 05 2012 Monument Peak (7110) big time bias
 Jun. 15 2012 Tahiti (7124) data released from quarantine
 Jun. 05 2012 Russian stations, 1887, 1888, 1889, 1890 are in quarantine
 May. 23 2012 Handling of Beijing data (7249), bias estimation starting 12/03/07
 May. 16 2012 reference to ILRS station upgrades file
 May. 15 2012 Tahiti (7124) put to quarantine (12/05/14), due to receiver upgrade
 Apr. 12 2012 Arequipa (7403) and Monument Peak (7110) data released from quarantine
 Mar. 14 2012 MOBLAS 4, Monument Peak, (7110) big range bias starting: 12/02/23
 Feb. 06 2012 Delete Observations for Haleakala (7119) 12/01/30-12/01/31
 Oct. 06 2011 Range bias estimation for 7821 (Shanghai) 11/05/28-10/09/03
 Sep. 30 2011 Problem with Matera 7941 Sep.24 18:00 - Sep.25 8:00 2011
 Sep. 21 2011 Exclude Simeiz data starting July 2011, increasing time bias
 Nov. 18 2010 mandatory Bias correction for Wettzell (starting March 2009)
 Nov. 12 2010 Bias correction for Arequipa (7403) added
 Sep. 15 2010 -20cm range bias for Haleakala July and August 2010
 Aug. 12 2010 100 ms time bias for MLRO from DOY 221 to 223 2010 included
 Apr. 23 2010 corrections of errors detected by F. Deleflie
 Apr. 15 2010 all corrections from Van's tables at CDDIS added

*-----

For informations on recent station upgrades and data in quarantine refer to:

<http://edc.dgfi.tum.de/en/stations/>

*-----

This file sets up a SLR data handling file for the official ILRS normal points provided by CDDIS (ftp://cddis.gsfc.nasa.gov/slrf/data/npt_crd/) and EDC (ftp://edc.dgfi.tum.de/pub/slrf/data/npt_crd/)

and contains information on pressure, range and time biases from SLR stations as well as information on passes and to be deleted.

A new section is now added (March 2019) that contains timing biases for the entire network and for the period 2008-2017, estimated from data taken by the T2L2 system on Jason-2. Timing biases and their rates are given in μs and $\mu\text{s}/\text{d}$!!!

For the year 1999 a set of single observations to be deleted, e.g. in GEODYN. source CDDIS (ftp://cddis.gsfc.nasa.gov/pub/slrf/data/slrf_data_corrections.snx)

The content of this file is a recommendation accepted by the ILRS

Analysis Standing Committee in Sep. 2007 with updates since then.

For stations in quarantine data should not be available on the public directories at the data centers. Stations marked with N, are unreliable and should be handled carefully, as unexpected range or time errors may occur.

LEGEND FOR SOLUTION/DATA_HANDLING

"M" Models codes:

- X = Exclude/delete data
- C = Target signature bias, Center-of-mass correction different to standard
- E = Estimation of range bias, known a priori values are given
- H = humidity error (correction in %)
- N = non reliable station, should not be used for routine processing
- P = pressure bias
- Q = Station with data in quarantine, should not be used
- R = Range bias to be applied, no estimation of bias
- S = Stanford event counter bias
- T = Time bias in ms or μ s & μ s/d (T2L2) to be applied, but not estimated
- U = Estimation of time bias in ms
- V = Station with not validated coordinates, not solving for biases

estimated values (where provided) must be subtracted from the 1-way observations
#####

*-----
Time Biases of SLR station clocks, relative to UTC, have been estimated
from T2L2 measurements during the Jason-2 mission: July 2008 to December 2017.

The method is using a time transfer from a master station (Grasse 7845)
where clock behavior is continuously compared to GPS time (then to UTC)
to each of the other SLR stations.
Grasse has been time calibrated resulting in an accuracy of 0.1-0.2 ns
of the time of measurements.

Pierre.Exertier@oca.eu & Alexandre.Belli@geoazur.unice.fr
September, 1 2017 Release 1.0
February, 1 2019 Release 2.0

Units: TB are in μ s (μ s) and drift in μ s/day

Resolution: by considering the time variations of each TB due to the clock drift, we considered only variations greater than 0.1 μ s to be reported.
Period Covered: 2008-2017

Record Format:
code station (e.g. 7845) "___" (to apply for all satellites) "us" (units)
"A" YY:DDD:SSSS (time start) YY:DDD:SSSS (time end) ?T?, then real values:
time bias and drift (or 0.0000)

Correct time = time of SLR NP data (t) - (TB + (t - t_midInterval)*drift)

where: t_midInterval = 1/2 * (time end + time start)

*-----

 **** SECTION WITH OPTIONAL CORRECTIONS COMMENTED with "*" in col. #1

 * * -----
 * T2L2 Tb and Tb-dot OPTIONAL DATA RECORDS
 * which are not significant for LARES and higher orbits (range equivalent <10 mm)
 * with COMMENTED by "*" in col. #
 * IMPORTANT: These Tb and Tb-dot values are in MICROSEC and MICROSEC/day
 *
 * NOTE: Users of SLR data for other (lower) targets should evaluate by themselves
 * the significance of these Tb errors for their particular circumstances.
